Follow us online:

Daikin AC: World leader in DX split systems. Allows multiple fan coils per condensing unit. Up to 295' height difference between FCU and CU without oil return problems. High efficiency R-410a systems. DX line sizing software available.

AcoustiFLO: Manufacturers custom plenum fan solutions which are AMCA 210 and AMCA 301 certified. Provides a technological breakthrough in engineered flow path for plenum fans.

Danfoss: Proven name in variable frequency drives for decades. New VLT-HVAC variable frequency drive, soft starts, native BACnet, and stand-alone AHU operation.

Dynamic Air Quality Solutions: Innovative, technologically advanced and affordable air quality solutions optimized to reduce energy consumption. Products include active media, sterile sweep UV and air purification systems.

Epsilon: Prefab central plants, pump houses, and pump skids. Central plants with high quality factory labor, shorter lead times, factory-tested systems, and less cost.

FAFCO: The world's largest manufacturer and innovator of polymeric heat exchangers, presents IceStor thermal energy storage systems. IceStor integrates with new or existing AC systems to generate immediate cost savings and long-term protection against rising energy costs.

Garfield: Leader in the field of commercial air purification using photo catalytic oxidation (PCO). The addition of this technology to air handling systems will greatly reduce the risks associated with volatile organic compounds (VOCs). Excellent for the K-12 and healthcare markets.

Griswold: Made in USA and GSA certified pressure independent control valves, actuated ball valves, manual balance valves, automatic balance valves, coil piping packages, hose kits and piping components and accessories.

Haakon Industries: Custom AHUs. Custom manufacturing gives the ability to design the perfect AHU for each project. Advanced drafting capability allows quick turnaround for CAD drawings on the most complicated designs.

Innovent: Custom manufacturer of commercial and industrial HVAC equipment including 100 percent outside air units, rooftop units, wheel and flat plate energy recovery units, gas heat and cooling, UL listed electric heat, all aluminum units or other special casing construction and sectionalized equipment.

International Environmental (IEC): Worldwide fan coil leader. IEC provides integrated engineered solutions for hotels, office towers, hi-rise condominiums, schools, universities, medical facilities and more.

Nextaire: Multi-zone Variable Refrigerant Flow Gas Heat Pumps and 11-ton packaged Gas Heat Pump (PGHP). A NSPE-PEI New Product Award winner, the Nextaire 11-ton PGHP will bring unmatched energy efficiency, outstanding environment advantages and impressive energy cost savings.

Nu-Air: Sensible only and enthalpy plate and frame energy recovery units. Nu-Air manufacturers advanced integrated HVAC system to improve the energy efficiency, comfort and air quality in your building while reducing space requirements and costs.

Plasticair: Lab exhaust fans. Since 1980, developed extensive lines of engineered FRP fans, scrubbers, Perchloric Acid Venturi fans, and high plume dilution fans.

HTS Parts: OEM parts provider and HVAC commercial aftermarket support. Large inventory of motors, compressors, VFDs and more.

Daikin McQuay: Market leader in innovation and design. Their magnetic bearing chillers and Rebel rooftop units are sweeping the market with ultra-high efficiencies. Superior manufacturing of water cooled chillers, air cooled chillers, air handling units, rooftop units, self contained units, fan coil units, PTACs, and more.

Powrmatic: Since 1927, Powrmatic air turnover units use high volume, low velocity air-circulation to distribute conditioned air to a large open space.

RAE Coils: RAE Coils has a strong focus on quality. This is evident by a product that meets your dimensions, performs according to your specifications, and arrives on time. Their quality control is not a "department," it is a way of doing business.

REFLOK: Reflok® provides a solution to the contractor that cannot be ignored. The use of mechanical connectors for tubing, and tube fittings eliminates brazing of the refrigeration piping system. Without brazing, a system remains clean without the need for nitrogen purge. We offer all Reflok connectors for copper and aluminum and we offer aluminum refrigerant tubing.

REYMSA: CTI Certified, all-fiberglass cooling towers. REYMSA offers the best value for a non-corrosive cooling tower. The combination of unique patented one piece casing and the use of the most advanced technology make REYMSA towers the best available towers on the market.

SEMCO: Energy recovery wheels (unitary and applied). Industry leader in 3-Angstrom wheel technology with the least amount of cross contamination in the world. Wheels available in unitary cabinets with or without coils, custom cabinets with numerous options, or loose wheels.

Siemens Controls: Open-protocol DDC Controls System with standard Internet access capabilities and full range of DDC Controllers for system configuration flexibility. Has a full line of Siemens Building Technologies HVAC products.

Tecogen: Natural gas driven chillers that provide building owners with a reliable, proven, efficient, and cost-effective alternative to conventional electric motor-powered chillers.

United Cool Air: Custom unit manufacturer for chilled water, DX, and heating units. Customizable solutions with indoor condensing units, vertical through-the-wall units, spot coolers and more. Residential, commercial, industrial, and military capability.

UVDI: Ultra-Violet lamps for commercial and hospital applications where flexibility and optimum cleaning power is required,

Valent: Manufacturer of premium-quality, high-percentage outdoor air, energy-efficient packaged rooftop ventilators. Constructed with premium features to reduce energy consumption, increase control over occupant comfort, and lengthen service life.
