Munters/DesChamps: The name in dehumidification for over 100 years. Commercial line for economical solutions to humidity problems in all project sectors. Desiccant dehumidifiers in all cfm ranges. **DesChamps** develops innovative solutions for energy recovery, outside air conditioning, improved indoor air quality, and air-to-air heat exchangers.

SEMCO: Energy recovery wheels (unitary and applied). Industry leader in 3-Angstrom wheel technology with the least amount of cross contamination in the world. Wheels available in unitary cabinets with or without coils, custom cabinets with numerous options, or loose wheels.

Seresco: Pool units packaged or split. Chilled water, DX, heating, and pool water heating. Units available from 1,000 cfm to 100,000 cfm. Backed by the person who invented and developed the conditioned natatorium.

Daikin Industries, Ltd.: World leader in DX split systems. Allows multiple fan coils per condensing unit. Up to 164' height difference between FCU and CU without oil return problems. High efficiency R-410a systems. DX line sizing software available.

McQuay International: Market leader in innovation and design. Their magnetic bearing chiller is sweeping the market with ultra-high efficiencies. The first AHU manufacturer to market semi-custom features on a standard AHU platform. Continues superior manufacturing of water cooled chillers, air cooled chillers, air units, rooftop air units, self contained units, fan coil units, PTACs, and more.

Haakon Industries: Custom AHUs. Custom manufacturing gives the ability to design the perfect AHU for each project. Advanced drafting capability allows quick turnaround for CAD drawings on the most complicated designs.

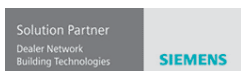

United Cool Air: Custom unit manufacturer for small product applications. Chilled water, DX, heating units. Customizable solutions with indoor condensing units, vertical through-the-wall units, spot coolers and more. Residential, commercial, industrial, and military capability.

Danfoss: Proven name in variable frequency drives for decades. New VLT-HVAC variable frequency drive, soft starts, native BACnet, and stand-alone AHU operation.

ENVIRO-TEC (ETI): Fan coil units and VAV boxes. Custom designs and materials. All types and configurations. Great on-line selection software available.

Siemens Controls System: Open-protocol DDC Controls System with standard Internet access capabilities and full range of DDC Controllers for system configuration flexibility. Has a full line of Siemens Building Technologies HVAC products.

AcoustiFLO: Manufacturers custom plenum fan solutions which are AMCA 210 and AMCA 301 certified. Provides a technological breakthrough in engineered flow path for plenum fans.

Addison: Energy saving water source and geothermal heat pumps to 100% fresh air-cooling equipment. They have packaged indoor and outdoor units to split systems in both straight cool and heat pump versions.

Epsilon: Prefab central plants, pump houses, and pump skids. Central plants with high quality factory labor, shorter lead times, factory-tested systems, and less cost.

Griswold: For over 45 years, Griswold Controls set the standard for innovative, reliable and quality products for HVAC applications. Features Automatic Flow Controls to dynamically absorb pressure fluctuations in the system. This does not change the flow through the valve maintaining +/- 5% of design flow. No additional balancing required reducing labor costs.

NuAir: Sensible only and enthalpy plate and frame energy recovery units. Nu-Air manufacturers advanced integrated HVAC system to improve the energy efficiency, comfort and air quality in your building while reducing space requirements and costs.

Plasticair: Lab exhaust fans. Since 1980, developed extensive lines of engineered FRP fans, scrubbers, Perchloric Acid Venturi fans, and high plume dilution fans.

TekWorx: Central plant optimization controls. Using adaptive algorithmic functions, central plant operational costs are minimized. System continues to learn as system changes and ages.

Tower Tech: Through industry leading technology, Tower Tech's Modular Cooling Tower offers the highest efficiency and the greatest reliability and built-in redundancy.

TRIA TEK: Offers a complete line of building control products that seamlessly integrate with most building automation systems. This includes: fume hood monitors and room pressure controls, air and liquid flow monitors, Humidity/temperature/air quality monitors, pneumatic output transducers, power supplies, controller/display products.

TROX: As a worldwide industry leader, Trox offers innovative air distribution solutions including underfloor air distribution, air distribution for performing arts and assembly areas, and chilled beams.

HTS TEXAS PARTS

Your # 1 source for OEM and wholesale HVAC replacement parts!

Parts Manager

John Renwall johnr@htseng.com

Parts Sales Counter

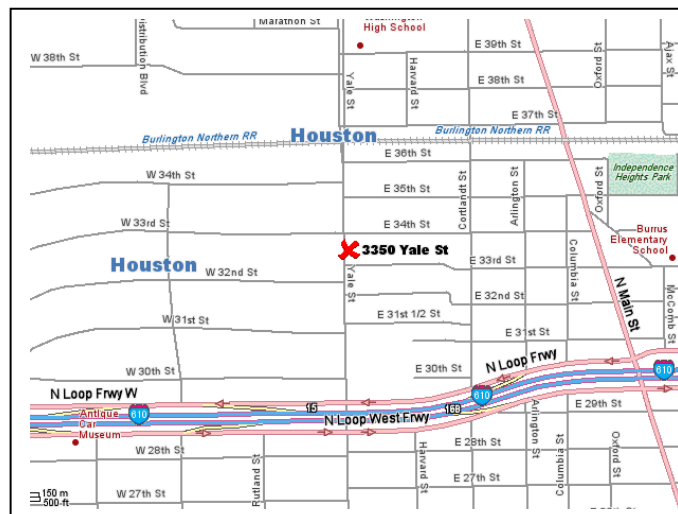

Greg Alexander grega@htseng.com
Billy Miller billym@htseng.com

We will do all your leg work on the parts and more.
